Terry Gong

Phone: 626-560-1197   Email: t3rrygong@gmail.com   GitHub: https://github.com/Terry0532

Skills

Front-end: JavaScript, HTML, CSS, jQuery, React

Back-end: NodeJS, ExpressJS, MySQL, Sequelize, MongoDB, Mongoose

Projects

GOOGLE BOOKS SEARCH

A MERN (MySQL, Express, React, NodeJS) stack application that utilize Google Books API for user to search Google's book library, and save the book to MySQL database for later use.

GitHub repo: Link   Deployed on Heroku: Link

WEATHER DASHBOARD

A single page application built with "mobile first design" in mind. Uses OpenWeatherMap's api for weather informations. Attention to details such as, provide user with their local time as well as the time of search result city; simple and intuitive GPS button for user's current location's weather; uses local storage to save user's last searched city for faster access when user open the site again.

GitHub repo: Link   Deployed on GitHub page: Link

BUDGET TRACKER

A simple budget tracker application with the functionality of offline access. Uses Service Worker to cache all the necessary files and IndexedDB to save user's transactions when the internet is not available.

Github repo: Link   Deployed on Heroku: Link
