Terry Gong

Phone: 626-560-1197   Email: t3rrygong@gmail.com   GitHub: https://github.com/Terry0532

Skills

JavaScript, HTML, CSS, jQuery, React, NodeJS, ExpressJS, MySQL, Sequelize, MongoDB, Mongoose, AWS EC2, AWS RDS

Projects

GOOGLE BOOKS SEARCH

A site that utilize Google Books API for user to search and save books, as well as a ranking page to display top saved books across all users.

• React and bootstrap for frontend; Sequelize and ExpressJS for backend; AWS RDS for database.

• JWT for user authorization, bcrypt to hash user password and dotenv to hide other sensitive data such as database username, password, etc.

• Uses ChartJS to display top 10 saved books from all users.

GitHub repo: Link   Deployed on AWS EC2: Link

WEATHER DASHBOARD

A simple site built with "mobile first design" in mind. Uses OpenWeatherMap's api for weather informations. Details such as, provide user with their local time and the searched city's time; a GPS button to get user's current location; uses local storage to save last searched city for faster access when user open the site again.
